

Daniel Branham

Senior Software Engineer

idanielbranham@gmail.com | Charlotte, NC | dbranham20.github.io

INTRODUCTION

Senior software engineer focused on full-stack development, AWS cloud architecture, and staying ahead of the AI learning curve. Extensive experience in collaborating closely with stakeholders and building systems that last.

SKILLS

Python Plotly Dash Terraform PostgreSQL SQL Server MongoDB AWS ECS
AWS Batch AWS Lambda AWS Step Functions .NET React Microservices
Cloud Architecture Claude Code

EXPERIENCE

Senior Software Engineer *Ally Financial, Charlotte, NC* March 2024 – Present

- Lead full-stack development and cloud architecture on two internal Treasury platforms (FORT Pricing, CLEAR) supporting one of the largest digital-only banks in the U.S.
- Engineered AWS infrastructure patterns now reused across the team; designed a novel ETL job framework later extended into a third project and handed off to a sustain team
- Built CLEAR cloud-native from the ground up; consolidated disparate data sources into a real-time view of available liquid cash, supporting Fed compliance and daily obligations

Software Engineer *Global Custom Commerce (Home Depot), Charlotte, NC* June 2022 – January 2024

- Built features for The Home Depot's Design Builder, enabling customers and in-store associates to customize and order doors, window blinds, and other made-to-order products

Software Engineer II / III *Honeywell, Fort Mill, SC* July 2019 – May 2022

- Joined a newly formed team in Safety and Productivity Solutions, building Operational Intelligence — a new product — from the ground up as part of Honeywell's push into software
- Co-owned multiple services across a 20+ microservice architecture and worked closely with the professional services team to support customer needs

Software Engineer Intern *Delta Bravo AI, Rock Hill, SC* October 2018 – May 2019

- Built features at an early-stage AI-acceleration startup using Golang, EmberJS, and Python

Undergraduate Researcher *University of North Carolina, Charlotte, NC* May 2018 – August 2018

- Summer REU in the AR/VR lab — built an Augmented Reality application for First Responders using Unity3D

Software Engineer Intern *SCANA (now Dominion), Columbia, SC* May 2017 – August 2017

- Developed tools for the Cyber Security team and shipped a media-team app during a 3-day hackathon

EDUCATION

Bachelor of Science, Computer Science

Winthrop University, Rock Hill, SC
2015 – 2019

High School Diploma

Thomas Sumter Academy, Sumter, SC
2011 – 2015
